

T-Series

The simple solution

EPSON®
EXCEED YOUR VISION

Ideal for pick-and-place applications

Intelligent, efficient and cost-effective, the comprehensive T-Series range is designed to make simple pick-and-place applications run more smoothly.

These 4-axis robots are the ideal automation solution where linear systems are used.

Introducing the new T6

The new T6 can transport larger, heavier objects using a 6kg payload capacity – double that of the T3 robot. The T6 can be equipped with heavy end-effectors, such as dual end-effectors for holding two objects at once, to help manufacturers increase factory productivity.

Power at an affordable price

The Epson T-Series offers an excellent price/performance ratio. The range of powerful 4-axis robots with integrated controllers starts from EUR 7,500. You have a choice of diverse connection options, including Profibus and Profinet. The T-Series range also supports image processing and integrates with external software. You can even design your own user interface to run on the robots.

The Epson T6 and T3 are available to order at www.epson.eu/store

Benefits of the T-Series at a glance

Flexibility: the 4-axis robot provides a great range of motion

Intelligence: powerful, integrated controller and system connection

Efficiency: simple cabling for easy operation and maintenance

Energy-saving: low power consumption

Space-saving: very small footprint, which includes the controller

Sustainability: battery-free position sensor

T3-401S

Range: 400 mm
Load capacity: 3 kg
Price: EUR 7,500 ex. VAT

T6-602S

Range: 600 mm
Load capacity: 6 kg
Price: EUR 9,500 ex. VAT

A class above manual operation and linear axes

Typical applications for the Epson T-Series include:

- Pick-and-place applications performed manually, or via linear axes, with a repeatability of 0.02 mm
- Part feeding, positioning and inspection tasks
- Assembly tasks, including those supported by the Epson Vision System
- Material coating at moderate speed

Inefficient manual pick-and-place applications

Easy-to-use T series automation

High complexity in applications with combined linear axes

Performance improvements compared with manual operation:

- More stable, continuous work processes
- Reduced error rate
- Seamless traceability in digitised processes
- Shorter throughput times

Performance improvements compared with linear axes:

- Lower running costs
- Significantly lower space requirements
- Simpler cabling
- Lower maintenance costs
- Increased flexibility
- Less unplanned machine downtime
- No restriction on single-purpose usage
- Connections for end effectors

Impressive performance

The T-Series features fully developed SCARA robots, which can be combined with a range of tools. The robots include six inputs and four outputs for end effectors.

An integrated controller not only saves space, but also greatly simplifies installation, commissioning and later replacement of the robot.

Internal power supply cables built into every Epson robot system ensure it is reliable and quick to commission.

Cut energy consumption by 30%

Power consumption on the T-Series robots is up to 30% lower than conventional SCARA robots. The environmentally friendly battery-less motor unit in the T-Series further reduces operating costs.

The perfect fit for your production line

The T-Series supports all these software options:

- Vision Guide 7.0** Epson image processing software with support for high-resolution cameras and colour cameras
- RC+ API 7.0** For convenient integration of external software and databases and the development of custom user-interfaces
- External control point (ECP)** For easy teaching of corners and curves
- GUI Builder 7.0** For designing your own user interface based on the simple Epson programming language SPEL+
- Optical character recognition (OCR)** For safe detection and control of fonts and symbols

Technical specifications

SCARA T3-401S

Design	Outwardly oriented horizontal articulated arm
Load capacity	1/3 kg
Horizontal range	400 mm
Vertical range	150 mm
Arm length	J1 225 mm + J2 175 mm
Orientation range	J4 +/- 360 °
Horizontal repeatability	J1, J2 +/- 0.02 mm
Vertical repeatability	J3 +/- 0.02 mm
Orientation repeatability	J4 +/- 0.02 °
Max. working range	J1 +/- 132 °, J2 +/- 141 ° J3 150 mm, J4 +/- 360 °
Max. axial speed	J1, J2 3,700 mm /s J3 1,000 mm /s, J4 2,600 °/s
Mass moment of inertia	0.003 / 0.01 kg.m²
Permanent press-in force	83 N
Installation type	Floor
Z-axis outside / inside	16 H 7 / 11 mm
Power ratings / cable length	AC 100 V to AC 240 V / 5 m
Certification	CE Mark, EMC Directive, Machinery Directive, RoHS Directive, ANSI / RIA R15.06 – 2012 NFPA 79 (2007 Edition)
Weight	16 kg

J1 = Axis 1 J2 = Axis 2 J3 = Axis 3 J4 = Axis 4

Package:

Epson robot with integrated controller

1 Epson RC+ program DVD including simulator

1 plug for emergency stop

1 plug for standard I/O

1 USB programming cable

Manuals on CD

1 installation / safety manual

1 TP/bypass plug (pre-installed at factory)

Available options:

Fieldbus slave card:
CC-LINK, Profibus, Profinet, Devicenet, Ethernet I/P,
EtherCat

Fieldbus master card (requires external PC):
Profibus, Devicenet, Ethernet I/P

Price ex. VAT from EUR 7,500

Technical specifications

SCARA T6-602S

Design	Outwardly oriented horizontal articulated arm
Load capacity	2/6 kg
Horizontal range	600 mm
Vertical range	200 mm
Arm length	J1 325 mm + J2 275 mm
Orientation range	J4 +/- 360 °
Horizontal repeatability	J1, J2 +/- 0.04 mm
Vertical repeatability	J3 +/- 0.02 mm
Orientation repeatability	J4 +/- 0.02 °
Max. working range	J1 +/- 132 °, J2 +/- 150 ° J3 200 mm, J4 +/- 360 °
Max. axial speed	J1, J2 4180 mm /s J3 1,000 mm /s, J4 1800 °/s
Mass moment of inertia	0.01 / 0.08 kg.m²
Permanent press-in force	83 N
Installation type	Floor
Z-axis outside / inside	20 H7 / 14 mm
Power ratings / cable length	AC 100 V to AC 240 V / 5 m
Certification	CE Mark, EMC Directive, Machinery Directive, RoHS Directive, ANSI / RIA R15.06 – 2012 NFPA 79 (2007 Edition)
Weight	22 kg

J1 = Axis 1 J2 = Axis 2 J3 = Axis 3 J4 = Axis 4

Maximise your production line efficiency

Epson robot systems: precise, fast and reliable

Epson offers one of the world's most extensive SCARA model ranges, including 6-axis robots, controllers and software.

Our products work together with precision, even at breathtaking speeds and often for up to 24 hours a day.

Epson Spider Robots

A unique design means the Epson Spider robot reaches every corner of its workspace to achieve unmatched cycle times.

Epson Scara Robots

Compact and powerful Epson SCARA robots work with total precision even at high speeds. We offer the world's largest range of SCARA robots, with over 400 variants.

Total support for your Epson robot systems

- We offer a comprehensive pre- and after-sales support programme on all our robot systems, including:
- Feasibility studies to maximise planning and project security
 - Support to improve planning and implementation
 - Introductory seminars, programming/maintenance courses, operator training
 - Inspection and individual maintenance ideas
 - Hotline and on-site repair service
 - Central spare part stocking

Epson Controllers

Robust, space saving integrated controllers manage both manipulators and peripherals.

Epson 6-Axis Robot

Extra flexibility from rotating axes offer unrivalled point-and-track accuracy, so complex work processes can be executed precisely.

Simulation of robot cells

Good preparation is everything. Plan and visualise all procedures in your production, validate your program offline initially and carry out troubleshooting and editing work easily from your desk. With the Epson RC+ Simulator – included in the software package – you save time and money through all phases of your project.

Phase 1 Design

Plan your robot cell at full size in advance and work out the expected cycle time for your application to check feasibility before a single part for the system has been made. Plan future system expansions in the simulation system to keep downtime to a minimum.

Phase 2 Integration

Completing the program validation process before the robots are delivered enables you to create programs at the same time, with the system capable of displaying and evaluating even complex motions. Collision risks are identified and equipment damage is prevented.

Phase 3 Operation and maintenance

Troubleshoot and modify programs from your desk. Use the 3D layout to visualise collision detection, reachability checks and robot motions.

About Epson

Epson Robotic Solutions is one of the leading suppliers of high tech robot systems that are renowned worldwide for their reliability. The product range includes six-axis robots, SCARA robots, the SCARA entry-level LS and T models, the special Epson-developed Spider and N robots types, as well as the pioneering Dual Arm robot. Added to this are image processing controls and the Epson Force Sensor for force-controlled applications.

This gives Epson Robotic Solutions one of the most comprehensive ranges of high-precision industrial robots in the world, making them a technological pioneer for intelligently controlled automation processes.

Technological pioneer

1982

Epson SCARA robots freely available in Japan for the first time

1986

First cleanroom robot class 1

1997

First PC-based controller

2008

Inventor of the right or left arm-optimised G3 SCARA robot

2009

Inventor of the spider – a unique SCARA robot with no dead zones

2013

First application of Epson QMEMS® sensors in robotics, reducing six-axis kinematics vibrations

2014

Epson Compact Vision CV2: Epson's own ultra-fast image processing computer

2016

Epson N2 series: World's first 6-axis robot with folding arm – extremely compact and space-saving

2017

Epson Dual Arm robot with an arm geometry inspired by human physiology, as well as integrated sensors such as cameras, force sensors, and accelerometers

Pre and after-sales support

Feasibility studies for maximum planning and project security

Support for planning and implementation

Introductory seminars, programming/maintenance courses, operator training

Inspection and individual maintenance concepts

Hotline service, on-site repair service

Central spare part stocking

Epson Industrial Solutions Center – find your solution

Experience all our Epson robots in action. Build, simulate and improve your automation application in a workshop cell, with help from our experts. The cell can be controlled and networked using all conventional fieldbus systems. In addition, we can supply you with modern peripherals such as a vision and conveyor tracking system.
